

2022-23

Activity Report

NATIVE MISSIONARY MOVEMENT

An Overview

During financial year 2022–23, Native Missionary Movement (NMM) continued its work across education, residential child care, family welfare, disaster relief, and community development, reaching tribal, rural, and underserved families across Rajasthan and neighboring states.

In education, NMM sustained a network of schools and training institutions—SAG School, St. Matthew's School in Jhadol, and St. Matthew's Mission School in Udaipur—while its Global Classroom and Leadership Training Center extended leadership formation to students and emerging leaders through a combination of online and residential learning. At the Manas residential center, NMM provided a full continuum of care to poor and needy children, offering housing, nutritious meals, healthcare, and schooling support in a stable, structured environment.

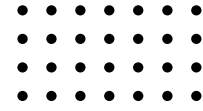

NMM also supported vulnerable families directly, through household assistance, education stipends that kept children in school, mobility support to open access to work and markets, and medical aid for urgent health needs. Community-facing work included borewell-digging projects that brought safe drinking water within reach of underserved rural households, alongside continuing pandemic-relief support and awareness camps, training, and seminars that strengthened local volunteers and field staff across several project locations.

Taken together, the year reflected NMM's holistic approach airing direct relief for the most vulnerable with sustained investment in education, leadership development, and rural infrastructure that continues to serve communities well beyond the year it was funded.

Who We Are

Native Missionary Movement is a charitable trust based in Udaipur, Rajasthan, working for the educational and socio-economic uplift of the underprivileged. We have been at this work since 1981.

What We Believe and Our Approach

At NMM, we believe lasting change grows from within communities. Our aim is not simply to provide assistance, but to equip people, strengthen families, and build local capacity for sustainable wellbeing and opportunity. Our work focuses on five interconnected areas:

- Education: creating opportunities for children and young people that can shape future generations.
- Skills and Livelihoods: developing practical, digital, and vocational skills for greater employability and income.
- Leadership Development: equipping people to serve and lead within their own communities.
- Rural Village Upliftment: addressing essential needs such as clean water, infrastructure, and schooling.
- Relief and Community Care: responding to immediate needs and supporting vulnerable individuals and families.

Together, these areas reflect a holistic approach to community development, addressing immediate needs while building the knowledge, skills, resources, and leadership necessary for lasting change.

NMM Activities

2022-23

Key Highlights

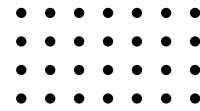

AWARENESS CAMPS, TRAINING & SEMINARS

During 2022-23, NMM conducted awareness camps, training programs, and seminars at Maccadadeo, Navapur, and Orissa, bringing together 75 volunteers. The programs focused on community awareness, capacity-building, and strengthening local volunteer networks, particularly among tribal and rural communities with limited access to education, healthcare, and livelihood opportunities.

The gatherings provided opportunities to hear community concerns, encourage participation, equip field workers and volunteers, and strengthen grassroots relationships. Training helped volunteers respond more effectively to local needs, while the seminars encouraged mutual learning, collaboration, and greater community ownership.

The key impact was building a more informed, equipped, and locally engaged network of volunteers and community leaders. By investing in people already connected to their communities, NMM strengthened its capacity for sustained outreach, improved local participation, and created a stronger foundation for addressing community needs over the longer term.

NMM Activities

2022-23

DISASTER RELIEF & BOREWELL DIGGING

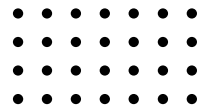

During the year, NMM installed 18 new tube wells across Udaipur District, benefiting approximately 320 households. In many underserved villages, access to clean, reliable water remains a major challenge, especially during dry seasons. Women and children often bear the burden of traveling long distances to collect water. By bringing safe water closer to homes, these projects reduce this daily burden and improve access to an essential resource.

The impact extends beyond water access. Reliable water sources support better hygiene, sanitation, and family health while reducing exposure to water-related illness. For children, particularly girls who may otherwise spend considerable time collecting water, improved access can support more regular school attendance and greater educational opportunity. Where families have access to small plots of land, borewell water can also support household agriculture, food security, and livelihoods, contributing to greater economic resilience.

Through this practical intervention, NMM is helping turn access to water into a foundation for healthier families, greater educational opportunity, and stronger rural livelihoods.

Education

St. Matthews School, Jhadol

SMS Jhadol is located in Jhadol, Udaipur District, and serves 450 students from the surrounding rural community. The school has 192 girls and 258 boys, including 16 students enrolled under the Right to Education (RTE) provision. The school is supported by a dedicated team of 16 teaching staff, one Principal, and 10 non-teaching and support staff, providing the human resources necessary for the effective academic and overall development of the students.

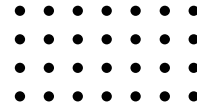

At SMS Jhadol, the focus on educational continuity and learning outcomes is reflected in strong student retention and participation throughout the year. All enrolled children remained in school through the academic year, with an overall attendance rate of 95%. A total of 450 children were promoted to the next class, while 335 children demonstrated measurable improvement in their learning levels. In addition, 19 children received partial fee support, enabling them to remain in school who otherwise would have been at risk of dropping out because of financial constraints. Together, these outcomes indicate not only continued access to education, but also sustained participation, progression, and measurable learning improvement among the children served.

THE IMPACT

Continued access to education, but also sustained participation, progression, and measurable learning improvement among the children served.

Education

SAG School, Makadadeo

Samuel House provides for children with ability and without means — the students who would otherwise never reach the classroom that matches their capacity. The school is located in Makadadeo, Baghpura, and serves a total of 118 students, including 55 girls and 63 boys. Of the total enrolment, 4 students are enrolled under the Right to Education (RTE) provision, while 10 children receive fee concessions, helping families facing financial constraints to keep their children in school.

The school is supported by 11 teaching staff, one Principal, and 3 non-teaching and support staff, providing the personnel necessary for the academic, administrative, and overall development of the students.. The school demonstrated positive outcomes in student retention, attendance, academic progression, and learning improvement during the year. All 118 children remained enrolled throughout the academic year, with an overall attendance rate of 90%. All 118 students were promoted to the next class, while 97 children demonstrated measurable improvement in their learning levels. In addition, 10 children received fee support, enabling them to remain in school who otherwise may have been unable to continue their education because of financial constraints. These outcomes reflect the school's commitment to ensuring continuity of education, supporting regular attendance and academic progression, and improving learning outcomes while making education accessible to children from economically vulnerable families.

A Holistic Approach

NMM schools aim to provide a holistic education that extends beyond academics, nurturing physical wellbeing, creativity, leadership, social awareness, practical skills, and responsibility to the wider community. During the year, students participated in a range of activities designed to develop confidence, discipline, curiosity, empathy, and life skills alongside their formal studies.

Sports and Achievement: Students received Tehsil-level recognition in sports, including cricket and badminton, demonstrating the value placed on physical fitness, teamwork, perseverance, and discipline.

Awareness and Community Engagement: Programs on health, hygiene, civic responsibility, environmental awareness, and social harmony helped students become more conscious of their responsibilities towards themselves and their communities. Sadbhavna Divas encouraged values of unity, peace, empathy, and respect for people of different backgrounds.

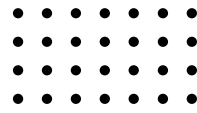

Career Guidance and Life Skills: Career counseling helped students consider subject choices, career pathways, and future opportunities in relation to their interests and abilities, particularly as they approached important educational transitions.

Experiential Learning: Practical science activities enabled students to explore concepts such as sound, centrifugal force, and Newton's Laws, connecting classroom learning with observation and everyday experience.

Compassion and Service: Students were encouraged to develop empathy through practical acts of care, including sharing a day's meal with a poor family and supporting disadvantaged children with books and stationery. These experiences helped nurture generosity, social awareness, and a sense of responsibility towards others.

Together, these activities help develop well-rounded, confident, socially responsible, and compassionate young people, preparing them not only for academic success but also for meaningful participation in their families and communities.

FBC – Developing Young Leaders

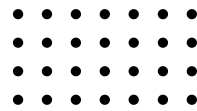

NMM's leadership development work seeks to develop young leaders through diverse educational programs and the Global Classroom digital initiative, equipping individuals with advanced knowledge, practical skills, and the capacity to serve effectively in diverse community and organizational contexts. The programs include entrepreneurial leadership, media studies, and bachelor's- and master's-level programs, creating opportunities for students and emerging leaders to deepen their knowledge while developing the character, critical thinking, and practical abilities needed for meaningful leadership.

The expenditure covered a broad range of educational and operational requirements, including online education and digital learning, faculty honoraria, remuneration for visiting professors, mess and hostel operations, broadband and electricity, and building maintenance and upkeep. Investment in online education was particularly important in extending leadership training beyond the physical campus. Through the Global Classroom, students and emerging leaders could participate in digital learning, widening access to quality education beyond those able to study in person. At the same time, support for faculty and visiting professors, along with hostel, mess, utilities, and maintenance, sustained the residential and academic environment necessary for focused, in-depth study.

During the year, the program reached 156 students, strengthening their soft skills, critical thinking, research capabilities, and leadership capacity. Faculty members and visiting professors brought perspectives and expertise not readily available in the region, while the residential setting enabled learning within a community of shared life, discussion, service, and reflection. For many of these students, the center provides a significant pathway towards future leadership in their communities, workplaces, and organizations. In this sense, the program represents one of NMM's important long-term investments in developing people who can serve others and contribute to the strengthening of their communities.

Skill Centre

Tailoring Skills, Dignity and Livelihoods

During 2023–24, NMM's Tailoring Centre continued to provide women from marginalised backgrounds with practical vocational training and an opportunity to develop sustainable livelihoods. The centre conducted two training batches, enrolling 18 women, of whom 12 successfully completed the training. With 12 sewing machines available at the centre, participants received hands-on training in tailoring and practical skills that can be applied for home-based or local income generation.

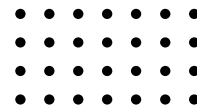

A particularly significant outcome is that eight women began earning income through tailoring, with an average monthly income of approximately Rs. 3,000. Eight sewing machines were provided to graduates, enabling them to continue practicing their skills and develop their own sources of income after completing the program. The program's significance extends beyond acquiring a vocational skill. Earning an independent income can strengthen a woman's confidence, decision-making capacity, and contribution to household finances. It can help families meet everyday expenses, support children's education, manage healthcare needs, or reduce dependence on unstable income sources. Through this initiative, NMM seeks to equip women not simply with certificates, but with practical skills, greater self-reliance, dignity, and the opportunity to contribute meaningfully to their families' economic well-being.

THE IMPACT

Practical skills, greater self-reliance, dignity, and the opportunity to contribute meaningfully to their families' economic well-being

Educational Residence

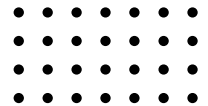

The Educational Residence at Manas provided a safe and supportive home for 50 children attending NMM schools, supported by eight staff members. Alongside accommodation, nutritious meals, healthcare, study facilities, recreation, sports, and a library, the residence provided consistent guidance and care to support the children's overall development.

Students also participated in IT and digital skills, life skills, civic awareness, communication, teamwork, and personal responsibility, helping them develop confidence, independence, and readiness for life beyond school. A health check-up and medical camp further supported their wellbeing.

Academic outcomes were encouraging, with 99% of Class 10 students and 100% of Class 12 students passing their board examinations. Forty-nine children progressed to the next class, while six Class 12 graduates moved on to higher education or employment.

The programme's impact extends beyond academic achievement, helping children grow into confident, skilled, responsible, and socially aware young adults with greater opportunities for further education, employment, and independent living.

Help to Poor & Needy / Family Welfare

During FY 2024–25, NMM continued to provide family welfare assistance, with particular attention to the needs of its support staff and their families. The assistance helped reduce financial pressures, strengthen household stability, and support staff in carrying out their responsibilities with greater security and confidence.

NMM also provided educational stipends for needy children, including assistance for studies beyond Class 12. This support enabled young people from financially constrained families to pursue higher education, strengthen their skills, improve future employment prospects, and work towards greater long-term economic independence. NMM provided medical and healthcare assistance to families facing health-related financial difficulties. By helping meet essential medical expenses, NMM enabled vulnerable households to access necessary care without compromising other basic needs.

During 2022–23, NMM continued its COVID-19 relief efforts, providing grocery supplies and medical assistance to families whose livelihoods remained disrupted by the pandemic. NMM also supported a Government Medical College with essential medical equipment, strengthening the public healthcare system's capacity.

Overall Impact: These interventions addressed both immediate household needs and wider community wellbeing. Family, educational, and medical assistance provided practical support to vulnerable households, while COVID-19 relief and medical equipment extended NMM's response to the broader community. Together, these initiatives reflect NMM's commitment to compassionate care, human dignity, educational opportunity, and strengthening community resilience.
